I played this game before it came on Steam, and it is amazing. It is a great game for people who like games like Mega Man and Shovel Knight, with really good level design and fantastic music.. This game is pretty fun, but mostly with friends, and you can get a good laugh.. Nobody is ever on, the idea of bots is great, but you can't do anything as a robber without the cop bot shooting you.. I'M TRYING TO PLAY A FREAKING GAME NOT JOIN THE KGB OR CIA. Horrible. Stay away.. An awful parody on a game long time forgotten. Lazy programming, non-existent gameplay, dull sounds. Music is okay, though.

Is it worth trying out? No.. Simple and gets boring pretty darn quick.. Very charming and well detailed visual novel, I really loved this game and can't wait for W Happiness :3. This game does a good job of making the player develop feelings towards the characters, and giving you the freedom to choose how you want to build your friendship/relationships with them. Though to get the full experience, you might have to play it multiple times. The choices you make in this game do affect the vast number of events that happen in the game. Though I feel like the writing and directing could've used a bit more work, because towards the end everything happened way too quickly and was very anticlimactic, which left me disappointed and a bit depressed.

If you have patience for lots of reading, drama, and romance, this game is well worth your time.

In my opinion its a really interesting and fun game to play, i enjoy the loot and fighting system. Although i havent finished it yet, it does deserve a thumbs up for being so fun!. Amazing game very satisfying to complete after hours of grueling torture of chasing giggling dolls and dodging bugged out ghost girls
5V5. Not worth it.

The base game is great, but this expansion does not add anything worthwhile to the game.
Sound design is terrible too. I recommend the silent children mod if you buy this DLC.. cheap and fun af. GREAT match3 game, one of the BEST in the series!!!

MUST PLAY.. Add Kpop Song :3. Game playability is good, can be used to kill time, game content can be enriched, looking forward to follow-up development
